

ENTRY PROGRAM

YAG Zero-to-One Program

From breakthrough to a product that can be built, sold and scaled.

The technology works in the lab, but it cannot yet be produced at the cost, quality and volume the market demands. There is no supplier base, the product cost is unknown, and investors are asking about manufacturing readiness.

Who it is for

Deep-tech and hardware companies after proof of concept, from Seed to Series A.

Innovation units in large companies with a new technology to turn into a product.

Investors who want to de-risk a portfolio company.

Four phases, with a decision at the end of each

Durations are typical and depend on the technology.

Engagement models

Diagnose: fixed scope and fixed price

Ongoing support: monthly retainer, hands-on, management-level

Investor-sponsored, with the company as the client

Optional fees tied to technical and operational milestones only

What we measure

Technology and manufacturing readiness (TRL / MRL)

Product cost against target

Pilot production yield

Time to production

Why us

Hands-on experience establishing plants, semiconductor fabs and cross-border technology transfers

Inventor experience in robotic 3D inspection and lens alignment

Fluent in engineering and in the boardroom

After the program, companies continue naturally to **Industrial & Programs** for scale-up, site setup and global expansion, and to **Capital Readiness** for investor and IPO readiness. A non-disclosure agreement is signed before any substantive discussion.

Yavets Advisory Group provides business, operational and technology advisory services and is not a licensed investment adviser, broker-dealer or placement agent. Fees are not contingent on any financing or transaction. Durations and measures are indicative, not guaranteed results. All advice expresses professional opinion only and is not a recommendation to take any action; decisions and any use are the client's sole responsibility. Patent rights referenced belong to the companies that filed them.

**From zero to one.
From one to scale.**
